- I. Claims 1-17, drawn to a wiring board, classified in class 257, subclass 780.
- II. Claims 18-21, drawn to a method of manufacturing a wiring board, classified in class 438, subclass 15+.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, instead of the penetration hole is formed at the same time as the interconnect pattern, it can be performed at different time after the interconnect pattern.
